# 3. HAZARDS IDENTIFICATION

THIS MIXTURE HAS NOT BEEN TESTED AS A WHOLE.

POTENTIAL HEALTH EFFECTS:

EYE CONTACT: Direct exposure to large amounts may cause eye irritation, but no permanent eye injury is expected.

SKIN CONTACT: May cause skin irritation upon prolonged and excessive contact. However, no skin irritation is expected with

normal, daily use.

May be harmful if swallowed in large quantities. INGESTION:

Overexposure to dust may cause respiratory tract irritation. INHALATION:

CHRONIC: This product contains a small amount of crystalline silica, a naturally occurring impurity in calcium carbonate. NTP

has listed crystalline silica as a known human carcinogen based on increased lung cancer rates in workers exposed to respirable-size (breathable) crystalline silica, primarily guartz and crystabolite, that are generated during sandblasting or similar activities in an occupational setting. IARC has determined that crystalline silica inhaled in the form of quartz or crystabolite from occupational sources is carcinogenic to humans. However, under

normal conditions of product use, no significant health risk to humans is expected.

4. FIRST AID MEASURES

EYE CONTACT: Flush eye with large amounts of water for 15 minutes. Get medical attention if irritation persists.

SKIN CONTACT: Flush area with plenty of water. Get medical attention if irritation persists.

HANDLING AND STORAGE:

Store in a cool, dry place. Keep container sealed to avoid absorption of moisture from air and possible loss of bleaching function.

**EXPOSURE CONTROLS/PERSONAL PROTECTION** 

**GENERAL CONTROLS:** Avoid eye contact. Avoid dust inhalation.
